

Advanced Asbestos Encapsulation System

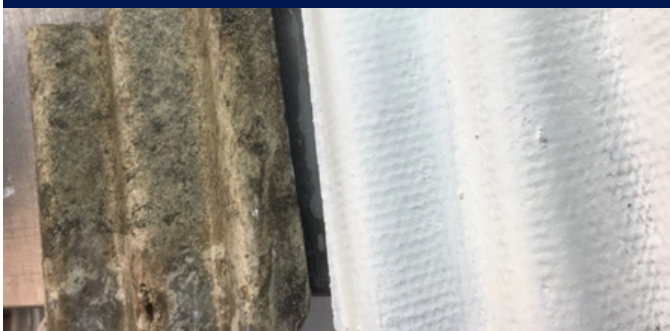

Astrapaints.co.nz
0800 278 727

Why Choose this System

- Allows undamaged non-friable asbestos to be left in place
- Designed specifically for Super 6 & Super Eight Asbestos
- Ensures asbestos is safely encapsulated
- Resistant to water, UV damage, and fungal growth
- 10+ years service life with proper maintenance
- *Complies with New Zealand's Health and Safety at Work (Asbestos) Regulations 2016*

* Application should be carried out by trained professionals

Untreated

Encapsulated

What Makes our Asbestos Encapsulation System Unique

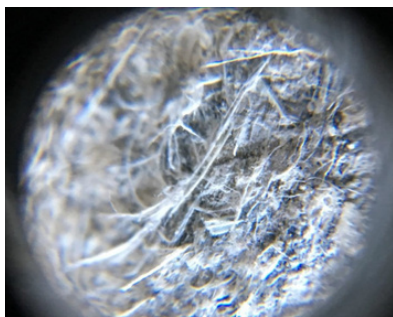

- **Comprehensive Protection:**
Penetrates and binds asbestos fibres to prevent harmful airborne particles.
- **Durability You Can Trust:**
Resistant to water, UV damage, and fungal growth.
- **Eco-Friendly Solution:** Water-based, fast-drying coatings with excellent adhesion.
- **Energy Efficient:** Reflective high-gloss finish reduces heat absorption, lowering cooling costs.
- **Manufactured for New Zealand Conditions**

How it Works

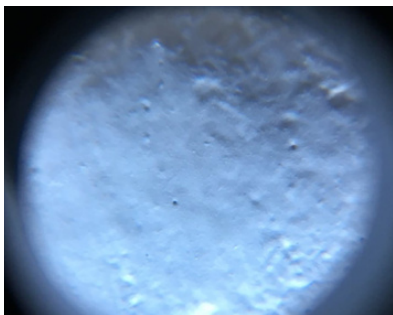

Comprehensive 3 coating system

- **Encapsulation Coat:** deeply penetrates and binds asbestos.
- **Subflex 1000 Coat:** delivers water resistance and additional Asbestos binding.
- **Hydrophobic Finish Coat:** provides high UV resistance and slows the build up of moss and mould.

Unbound or unprimed Super 6 Asbestos under a microscope

Super 6 coated with Specialist High Build Liquid Polymer under the microscope.
